He entered the service in January, 1835, and re-ceived his commission as Lieutennat Comman-der in July, 1862. New School Buildings .- The Special Committee of Councils appointed under the resolu-tion offered by Mr. Mersbon, of the Ninth Ward, on Thursday last, inquiring whether the new school buildings were so constructed as to be heated by steam alone, held a special meeting in the Controller's building yesterday afternoon The Committee on Property of the Board of Central appeared before said committee, and showed by a communication from the architect, Mr. Striney, that of about two-thirds of all the buildings being erected, he had provided for hot-air flues in all of them, excepting at the commencement, when he understood there would be a difficulty in getting sufficient appropriation to heat them by steam, when he after-wards made the plans of the buildings to heat them by hot air or steam.

The Committee on Property of the Board of School Control also stated that they had given out but one contract to heat by steam, and that was in the Eighth Section, which contract was approved by Councils.

Special Committee of Councils then agreed to report back a resolution with the in-formation derived from the architect of the Ballaing Committee, that all the necessary flues were in to heat by steam or water.

LARCERY OF GOLD WATCHES .- Two gold watches, one valued at \$225, the other at \$180, were stolen, yesterday, from the watch and jewelry store of Lewis Dediow, No. 1023 Race street. The circumstances under which the their took place were these. In the morning two young men, genteely dressed, called at the store, and requested to be shown some gold watches. This was done, and, without making a purchase, they left, promising to call again. Before going one of them said to Mr. Dedlow that he supposed he was there all day; to which the reply was that he only left during the dinner hour-between 12 and 1 o'clock. One of the persons called between the hours designated, at which time Mr. Dedlow was not present. The attendant was asked to show the wa ches again which had been inspected in the morning, and he laid them out on the counter. While waiting, the pretended purchaser said that he could not decide which of the watches he would take in the absence of his sister, whom he expected every moment. He finally asked for a drink of water, and was directed to the rear of the building. He started as it to go, but returned, and said that the occupants were at dinner, and he did not like to go back. The attendant then, at the stranger's solutiation, went back, and while he was gone the watches were carried off.

It is alled from the cellar to the roof with colored families. The Juspecters have also ordered to be taken down two old stone buildings on the cast side of Juniper street, near Flizwater, which have not been tenanted for some time, and are considered in an insecure some time, and are considered in an insecure condition. Action was taken upon the lastnamed some time ago, but the order was not carried out, because during the summer months the Court of Common Pleas, through which the order of the Sheriff must pass, was not in

AMUSEMENTS.

BLIND TOM -It is a fact unprecedented in the quested world that Blind Tom's genius has titracted and is still attracting universal attenattracted and is still attracting universal attention, as the crowds which nightly gather in
Concert Hall amply testity. It is a matter of
doubt whether any other musical estentity
could over become such a feature in our city,
for Blind Tom possesses the qualities of
combining several attractions. His entertainments not only please a simply musical taste,
but interest a scientific or philosophical one,
We would, therefore, advise (as this is his last
week smoon us for some time) that all who
have not seen him, if there be any such, should
seize their earliest conortunity of winessing seize their earliest opportunity of witnessing this rare musical prodigy.

The hygrometric condition of the air as produced by
